

Hi-Hog Farm & Ranch Equipment Ltd.

NEW

Foothills Series Box Stalls

Spend more time with your horse and less time with the chores.

Hi-Hog's most popular stall front now comes with a corner combination feeder option. With this new option you can quickly and safely access both the hay and grain feeders without having to step into the stall. The sheeted side panels ensure you won't be bothered while you are filling the feeder.

NEW

Corner Feeder

If you simply want a gate to allow you to place hay in the stall you can get the same front with the feed gate option. Include a support rail and you can add a grain feeder (see right)..

Returning to the Hi-Hog product line is our newly improved corner grain feeder (A) and support ring (B).

If your customer wants to mount the corner feeder on a front complete with feed gate you will require the additional of a support rail (C).

NEW

New Folding Horse Trailer Panels

New Design. Our folding panels have been very popular however some found the panels to be a little heavy. So we've changed the panels from a three section fold-out panel to a two section fold-out panel. At only fifty pounds for a 14' section of pen this makes for a strong portable solution that sets up quickly (no tools required).

Item #746 2-Section Folding Horse Trailer Panel..
