

Parallel Axis Squeeze Chute

Designed to work hard so you don't have to.

Highly regarded for its effortless operation, efficient design and superior craftsmanship, the Hi-Hog Parallel Axis Squeeze Chute sets the standard for all others to follow.

Features

Parallel Axis Squeeze Chute - Headgate

More features...

To reduce animal bruising the headgate is mounted to the squeeze body with shock absorbing spring bolts.

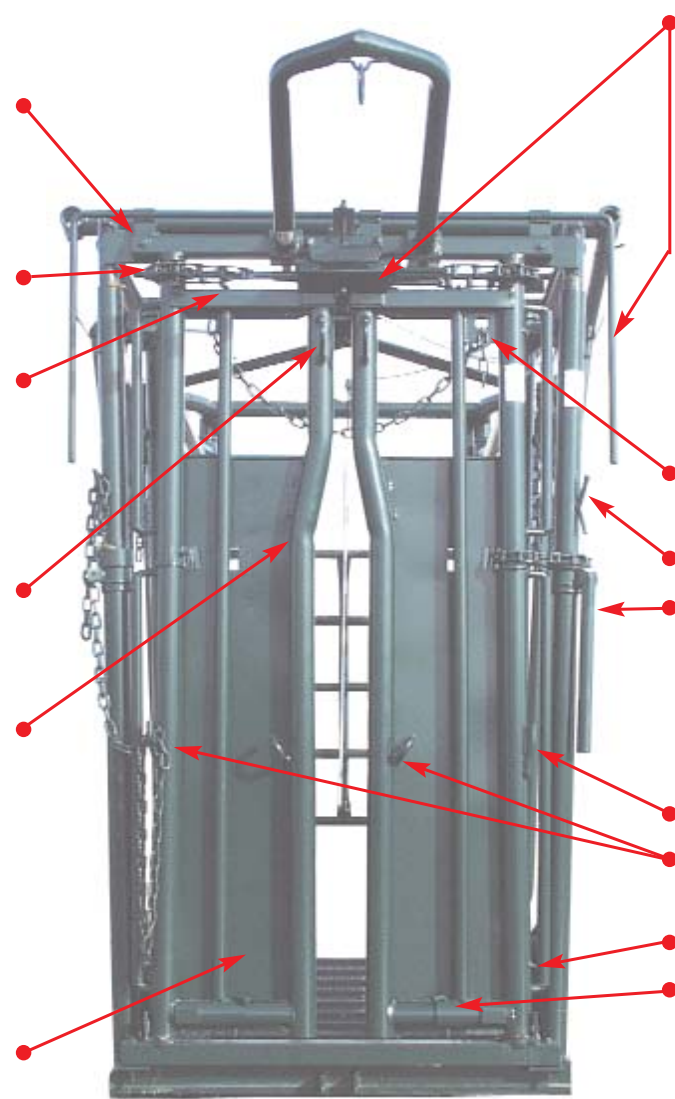

Extra heavy duty timing chain for a long working life.

Top headgate stanchion width adjustment. Stanchion opening can be adjusted between 5" and 11". Three adjustments on both sides.

Safety guards protect the headgate latch against accidental animal release.

Bottleneck stanchion design. The bottom verticals of the stanchion are straight to eliminate the possibility of choking. The upper verticals bottleneck in at 48" height to minimize the upward movement of the animals head.

The headgate is sheeted to protect your livestock.

- Independent stanchion latches. One handle releases the headgate either outward or inward, but *never* both.
 - Pull headgate release towards the back of the squeeze to swing the headgate 90° into the squeeze.
 - Push headgate release towards the front of the squeeze to swing headgate 90° out from the squeeze.
 - * No risk of hip-lock with 180° swing.
- Auto-catch position is set quickly and simply with limiter chain.
- Rope dally cleats.
- Headgate handle is mounted on the outside frame to provide a faster response as well as keeping the operator safely out of the headgate opening.
- Chain latch.
- Head tie chain, and pigtail chain retainers.
- Grease zerts on hinge collars.
- The bottom headgate stanchion comes with three width adjustment settings on both sides.

"We use a Hi-Hog squeeze chute with our 150 Charolais, Simmental cows. The chute gives excellent restraint and control and it is fast, simple, safe and convenient to operate. It's also excellent for getting calves to suck"

*Brent Jacobson
Loon Lake, SK*

"The Hi-Hog Squeeze is the best chute I have ever used! It's fast and easy to operate and everything works smoothly. Everyone who has been around it likes it."

*Don Eklund
Shawmut, MT*

"Our Hi-Hog squeeze is safe and easy to operate"

*Terri Tomlinson
Redwater, AB*

Squeeze sides at full width. Headgate swung fully into squeeze.

Squeeze sides at minimum width. Headgate swung fully out from squeeze.

| Outside Length | Inside Length | Outside Height | Inside Clearance | Base Width | Outside Width | Inside Width | Item Number | Weight (pounds) |
|----------------|---------------|----------------|------------------|------------|---------------|--------------|-------------|-----------------|
| 108" | 96" | 85" | 72.5" | 40" | 58" | 32" - 12" | 1550 | 1670 |
