

Universal Loading Chute

This chute is all you need to load and unload your livestock. The extra heavy duty loading ramp quickly adjusts for secure loading from stock trailers to cattle liners.

Superior craftsmanship and a powder coat finish for unparalleled durability and outstanding quality.

For the safety of your livestock the inside of the chute is lined with 48" of sheet metal to minimize injury.

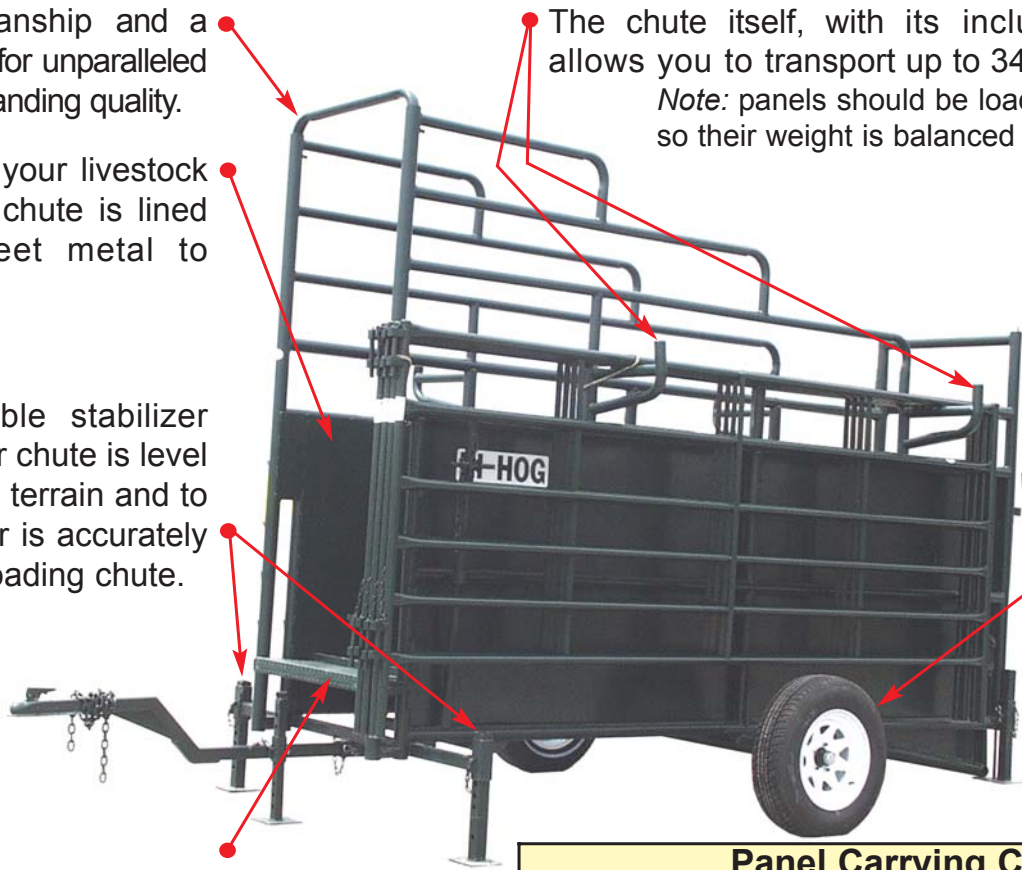

Includes adjustable stabilizer legs to insure your chute is level and stable on any terrain and to insure your trailer is accurately aligned with the loading chute.

Solid 100% steel construction. The loading ramp is made from 1/8" checker plate flooring with 1.25" square tubing traction bars on 12" center.

The chute itself, with its included panel hangers, allows you to transport up to 34 corral panels.
Note: panels should be loaded and tied to the chute so their weight is balanced ahead of the chute axle.

Equipped with standardized connectors which allow you to attach any of Hi-Hog's panels or rolling doors without the need for adapters.

Transportation Kit includes a removable towing tongue with 2" coupler, axle and two new 15" tires and wheels.

Panel Carrying Capacity			
Panel Type	Capacity on Panel Hangers	Capacity Inside Chute	Total
Heavy Duty Panels	14	16	30
Corral Panels	16	18	34

Loading height easily adjusts from 17" to 51" (no tools required)

Chute comes with a jack for hitching to truck, levelling chute and adjusting ramp.

Palpation Cages

Hi-Hog's palpation cages provide a convenient and secure environment for performing preg checks or artificial insemination.

- The cage can be accessed from either side. It includes two heavy duty 66" high gates equipped with spring loaded plunger latches.
- Gates lock quickly and securely both in the closed position as well as across the alley providing a barrier from animals in the alley.
- Each of the gates on the adjustable palpation cage include a swing panel which swings in and locks to create a narrow 'V' alley which deters calves from turning around.
- Cage connects directly to squeeze and alley spreaders.
- They're constructed with 1.9" O.D. high tensile 60,000psi tubing.

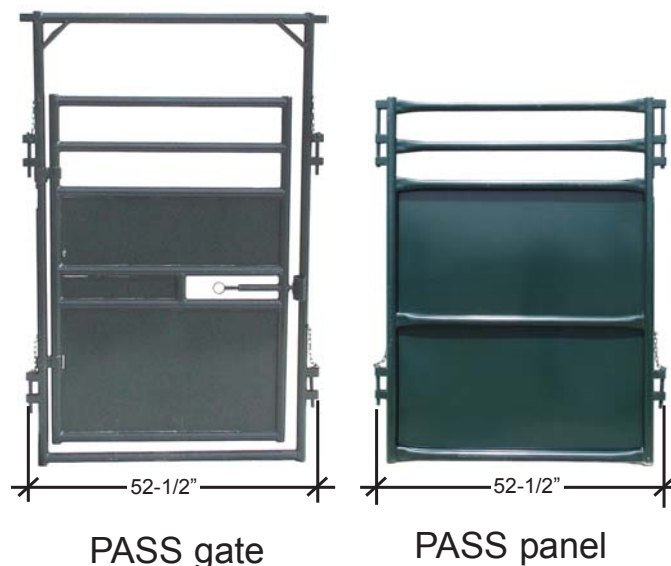

Item #	Description	Weight LBS	Width	Length	Height
80	Straight Palpation Cage	175	35 5/8"	37"	80"
1560	Adjustable Palpation Cage	200	35 5/8"	37"	80"

Palpation And Sorting Section (PASS)

The PASS gate and PASS panel offer exceptional flexibility.

The connectors on these items are the same as Hi-Hog's complete line of panels so they can be freely placed where you need them. They've been used in load-out alleys, crowding tubs, working alleys, and sorting alleys. Most commonly the PASS gate and PASS panel are paired up to make a short adjustable working alley with excellent sorting ability.

- The frame is constructed of high tensile 1.9" O.D. 14ga. tubing with 16 ga. sheet metal.
- The 42" wide by 66" high gate comes with a plunger latch.
- Connectors come with a pin and chain.

Item #	Description	Weight LBS	Width	Height
85	PASS Gate	120	48"	80"
86	PASS Panel	93	48"	66"
