

Insulated Earth Tube

* Photo demonstrates cut away version. Shows insulation factor.

Insulated Earth Tube

- *Conserves ground source heat*
- *Structural strength and insulation second to none*
- *Easily stackable to extend to your desired water line depth*
- *Great addition to any SPI Livestock Waterer*

- Conserves the earth's ground source heat as it rises up the vertical shaft to help protect the water line from freeze ups.
- Excellent insulating properties (R15) and amazing structural strength.
- Easily stackable for deeper installations.

Part Specifications

Dimensions: Insulated Earth Tube

Width 12 ¾" (32.4 cm)
Height 49" (124.5 cm)

Insulation:

2 ½" (6.4 cm)

Uniqueness:

Join together for desired length

For Models:

All SPI Livestock Waterers
