

# FEEDERS

## Bull Mineral Feeder

This heavy-duty, 3-compartment poly feeder stands up to the most difficult environmental conditions. Each compartment holds approximately 10 gallons of water/feed. Total wet volume is 30 gallons. Total dry volume is approximately 24 gallons. This feeder will hold 240 lbs. of water and 180-200 lbs. of dry feed. Standing 14" high, this 45" diameter tub is heavy enough to withstand animals and the elements but light enough to move to nearly any location. Convenient anchoring holes make it easy to secure the feeder to the ground, preventing animals from moving it. The weatherproof poly lid protects the contents of the entire feeder. Resistant to impact as well as heat and cold, this feeder presents smooth edges for safety to both people and animals.

Description	ITEM #	Height	Approx. Weight	Diameter
Bull Mineral Feeder	BMF	14"	39 lbs.	45"

## Standard Mineral Feeder

Our Standard Mineral Feeder is made with the same quality and features as our heavy-duty model but requires no assembly. Custom built with 1-1/2" round tubular steel, this feeder is sturdy enough to easily withstand the elements. Featuring a rotating 1/4"-thick poly tub, protective molded wind vane, heavy-duty roller bearing and 46" diameter base of a 5/8" steel rod to resist tipping, it is available in red only.

Description	ITEM #	Height	Approx. Weight
Standard Mineral Feeder	SMF	35"	38 lbs.

**NO ASSEMBLY  
REQUIRED!**
