

PALPATION CAGES

Palpation cages provide a secure environment for performing preg checks or artificial insemination. Both cages include access gates on both sides. The 66" high gates also lock quickly and securely across the alley providing a barrier from livestock in the alley. The gates on the adjustable cage include a lower swing-in panel which narrows the alley width to deter calves from turning in the alley.

PALPATION CAGE STRAIGHT SIDES	
Width	35-5/8"
Length	37"
Height	80"
Weight	230 lbs

PALPATION CAGE ADJUSTABLE SIDES	
Width	14" to 35-5/8"
Length	37"
Height	80"
Weight	275 lbs
Item Number	1560

ADJUSTABLE LOADING CHUTE

This chute is all you need to load and unload your livestock. The extra heavy duty loading ramp quickly adjusts for secure loading from stock trailers to cattle liners. Ramp height adjusts from 12" to 51".

Superior craftsmanship and a powder coat finish for unparalleled durability and outstanding quality.

Optional panel hangers (Item 77) are available for those who wish to transport panels with the loading chute. Note, Panels should be loaded and tied to the chute so their weight is balanced ahead of the axle. Maximum axle capacity is 3,196 lbs.

Equipped with Hi-Hog's standardized connectors which allow you to attach any of Hi-Hog's panels or rolling doors without the need for adapters.

The body of the chute remains level at all times making it easy to attach to a lead-up alley.

The chute comes with a jack to assist with both setting the ramp height as well as for hitching to a truck or levelling the chute.

For the safety of your livestock the inside of the chute is lined with 48" of sheet metal.

The Loading Chute length is 12'-4" with the towing bar removed.

Solid steel construction. The loading ramp is made from 1/8" checker plate flooring with 1.25" square tubing traction bars on 12" centres.

The Transportation Kit includes a removable towing tongue with 2" coupler, axle and two new 15" tires and wheels. The wheels do not have to be removed to use the chute.

DESCRIPTION	ITEM NUMBER	WEIGHT
Portable Loading Chute	75	1,438 lbs
Stationary Loading Chute	76	1,341 lbs
Optional Panel Hanger	77	12 lbs each

Includes adjustable stabilizer legs to insure your chute is level and stable on any terrain and to insure your stock trailer is accurately aligned with the loading chute.
