

Calving Equipment

The Double Header Calf Tipping Table

With quick catching headgates at both ends of our calf tipping table, one can brand on either the left or right side without making any changes to the table (the perfect table for sharing). Engineered for one operator, this well balanced table will handle animals up to 500 lbs, making it the ideal table for branding, ear implants, castration, and neck injections.

- Both headgates can be quickly locked open for handling large calves
- Quick, safe and simple squeeze action
- Equipped with convenient tie loops for securing to your alley or squeeze
- Four spring loaded side access bars swing out of the way providing safe, fast access to the full length of your calf
- Easy leg tie back

Shipping dimensions: 5' x 5' x 5'

Item #56	Weight: 365 lbs
----------	-----------------

Calf Alley Lift-Up Gate

- Rope and pulley system on this 18" wide spreader allow the operator to move freely when they need to work the flight zones
- Ideal for a one man operation
- The spreader includes connectors on both sides so that it can be set up at the end or in the middle of an alley
- The gate can be set up for left or right side operation
- Chain latches have been mounted at the base of the spreader to make it easy to securely chain your calf tipping table

Item #59	Weight: 54 lbs
----------	----------------

Calving/Trimming Chute

A multi-purpose chute for calving or cattle trimming and grooming.

- 4-H, vets and ranchers
- Includes four split panels hinged at the headgate which swing independently to provide clear access
- The upper split panels also come with drop pins that secure them to the lower split panels
- The upper left panel comes with a chain to latch on to the top right split panel to restrict movement
- To restrict animal movement, the chute includes drop pins on the bottom split panels which lock into slots on the floor
- For trimming and grooming simply swing the split panels to the side and insert the side poles into one of the two sets of sleeves found in the chute floor
- Includes head tie bar
- Dimensions: 34"W x 96"L x 80H

Item #125	Weight: 850 lbs

Calving Enclosure

Designed for safe and efficient calving.

The self catch headgate with adjustable stanchions is centered so the cow is accessible from both sides. This is excellent for getting twins to suck, or to get a calf to suck while you milk out on the other side.

The convenient entrance gates on either side of the headgate come with self-locking plunger latches for quick access. The split side panels can be swung out to the sides of the enclosure to assist in catching the cow and because the split panels hit the side panels at an angle the handler can't get trapped.

The split gates can be easily removed to create a 66" high, 10' x 10' pen. When the calving season is over the components can be used elsewhere. The side panels extend 2' beyond the front panel to provide added stability. Overall size is 10' x 12'.

Item #1130	Weight: 1141 lbs

Calving Barn Design

"Hi-Hog designed a penning system which featured a calving enclosure for my 21' x 21' barn. It has worked out exactly as planned and has exceeded my expectations. The equipment is easily installed, very functional and a dream to operate. I recommend Hi-Hog products to every operator who believes in less stress for themselves and their animals. This is the first time in my life that something has worked out as planned."
