

## Equine Panels

### Arena Panels

Hi-Hog's versatile, 12' long and 6' high arena panel (Item # 2922) can be used in the construction of round pens or arenas. This panel weighs less than our Heavy-duty panels but is stronger than our Corral panels. Constructed with 60,000 psi high tensile 1.9" 16ga. steel tubing for superior strength. Panels come with pin & chain connectors at both ends. Universal connectors allow you complete freedom to combine with any of our panels or frame and gates.

### Round Pen Panels

Designed specifically for the equine industry, Hi-Hog's round pen panels represent the perfect balance of portability and strength. Both the panels and gates are 6' high; the height recommended by professional trainers. Constructed with 60,000 psi high tensile 1.5" steel tubing for superior strength (all tubing is 16 ga. except for the gate frame which is 12 ga.).

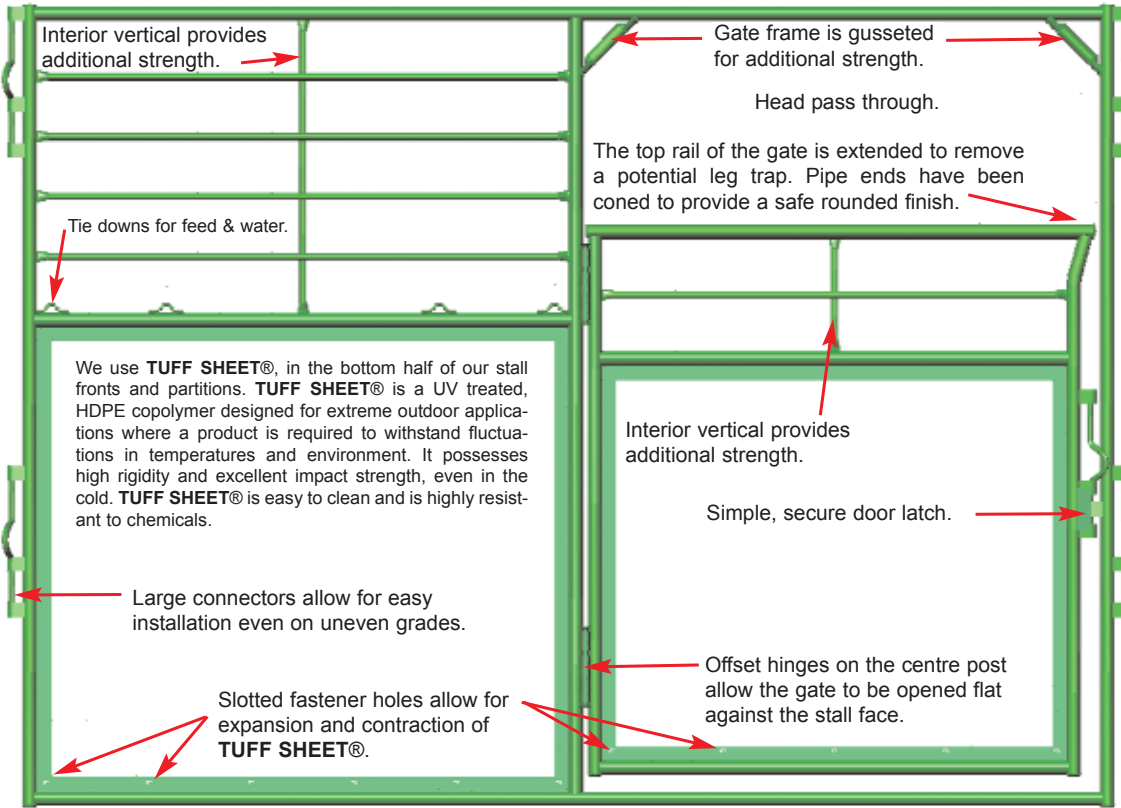

### Round Pens

Diameter	# of 10' Panels (Item #2910)	# of 6'w x 9'h Gates (Item #2906)	Total Weight (lbs)
40'	12	1	1149
50'	15	1	1416
60'	18	1	1683
70'	22	1	2039
80'	25	1	2306

## Portable Horse Stalls

Hi-Hog horse stalls can be found at many of North America's premier equine venues including Spruce Meadows, Thunderbird Equestrian Centre and The Calgary Stampede. For those who demand excellence, Hi-Hog offers a high quality portable horse stall. Designed for quick, hassle free installation, they are ideal for those who rent out stalls. The panels are light enough to handle and strong enough to endure multiple installations. Four men and a forklift can install 300 stalls in a day.

Our partition panels come with three-way connectors on one end. This design means that a bank of back-to-back stalls will only need one stall post. This makes installation a breeze. And since our three-way connectors pivot in line with the partition for shipping you can stack them flat and ship them efficiently without damaging the connectors.

With the modular design you can have one stall or a hundred stalls. Stalls can be purchased with or without roofs. Roof tarps are designed for stall configurations 20' wide by 30' long minimum. For roof pricing or help with your design call toll free:

**1-800-661-7002.**

"Spruce Meadows opened in 1975 and Hi-Hog was there. Over the years Hi-Hog has supplied us with both box stalls, temporary stalls, and round pens. They have also supplied us with a number of products, not directly linked to the equine industry, such as bleacher stands. In addition Hi-Hog has been able to help us with a number of special projects such as the transport stall they built for us which we use to safely unload horses from aircraft. We continue to work with Hi-Hog because their products and service have always been top notch."

Randy Fedorak,  
V.P. & Director, Special Features,  
Spruce Meadows, Calgary, Alberta

Item #	Description	Weight
4401	10' x 7' Portable Stall Front	186 lbs
4411	10' x 7' Portable Stall Partition	180 lbs
4421	7' Portable Stall Post	10 lbs

## Tie Stalls

**Tie stall panels** are 10' long. Their height varies from 7' tall at the front to 52" at the rear. The front of the panel attaches to the wall with two wall brackets (item 4060). The rear of the Tie stall panel comes standard with an adjustable vertical mounting bracket for attaching to the floor and ceiling. This bracket can be adjusted for ceiling heights from 8' to 12' in height. The raised portion of the panel comes with 16 gauge sheet metal. The bottom of the panel frame includes a channel ready to accept 16 pieces of 2" x 8" x 47.5" lumber. *(wood and wood fasteners are not included)*

**The mangers** come with brackets for mounting at the front to a wall and sleeved brackets on the side sleeve to attach to the side of the tie stall. The manger comes with a ring for tying off your horses. 8 cubic foot capacity.

## Box Stalls

For more information on our line of horse products including Box Stalls, Portable Stalls, Stall Accessories, Round Pens, and Roping Equipment call 1-800-661-7002. Please note the descriptive name is followed by the actual dimension. The actual dimension is taken from the outside edges of the end verticals. Connectors project 1" from verticals.

### Box Stall Fronts

Our premier line of Stall Fronts come standard with the door on the right side. The 4' wide rolling door comes complete with a horse window. The door travels smoothly on 4" silent nylon rollers. A corner feed gate permits feed to be placed in the stall without entering the stall.

Stall fronts are sold as frames only and do not include wood.
