

STALLS

Premium Horse Stall

Our Sliding-Door Horse Stall is one of the leaders in the equestrian market. Ideal for open barn/shed applications, the 7' tall sides and fronts can be ordered separately or as a complete unit. A stall front can be installed in an existing barn or you can convert a barn by using the entire stall. Individual corner bracket allows for one or multiple side-by-side units. This unit features an optional swing-out poly hay and grain feeder for ease in filling and cleaning. Stalls are designed for vertical installation of 2x lumber. Stalls do not include wood or other filler material. Available in gray or hot-dipped galvanized.
