

The Heavy-Duty, Multi-Purpose **RHINO GRIP™**

The **RHINO GRIP™** was designed by a member of an elite outdoor rescue team to perform a number of indispensable duties. The versatile **RHINO GRIP™** has performed thousands of times under harsh conditions without failure.

The **RHINO GRIP™** is made from a heavy-duty fiberglass-filled nylon material that resists cracking even at -65° F (-53°C). The large powerful clamping jaws allow you to instantly create a fixture onto which you can tie a rope, strap some webbing, or hook a bungee cord.

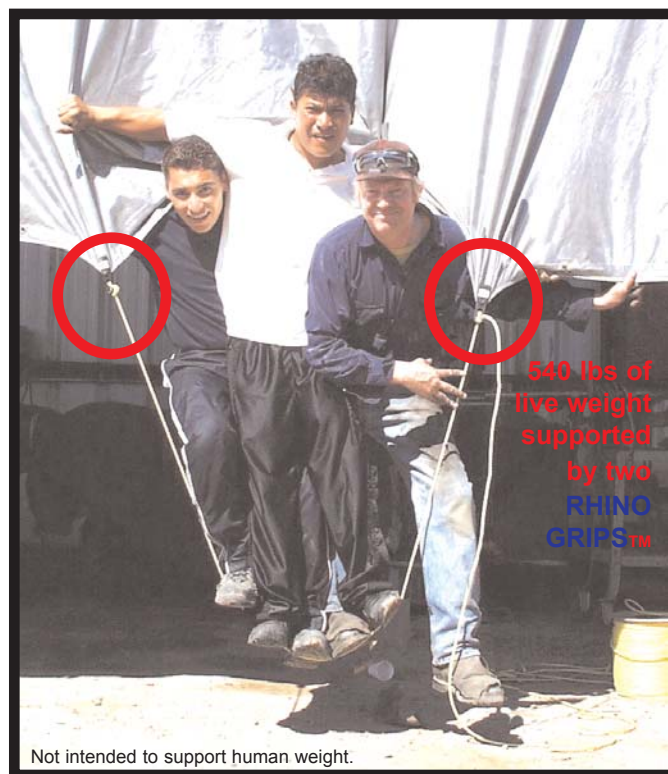

The **RHINO GRIP™** acts as a portable grommet. Simply place the sheet material in the teeth of the **RHINO GRIP™** and twist down the butterfly nut to its maximum tightness. Now you have an instant grommet exactly where you need it.

Hundreds of markets:

Farming, Ranching, Hunting, Fishing, Camping, Recreation, Boating, RV's, Home & Garden, Construction, etc.

Thousands of uses:

for around the home, the cottage, the farm, the worksite, and the wilderness. Wherever you go the Rhino Grip has a use. If you need to tie-it-down, hang-it-up, hook-it-on, or loop-it-through the versatile Rhino Grip is the perfect tool. It's use is only limited by the customer's imagination.

The **RHINO GRIP™** can be clamped anywhere on a tarp to create a hold where you need it. The large clamping area provides a solid grip for gripping plastic films, tarps or other sheet material. For increased holding power simply remove the clamping bolt and thread it through the existing tarp grommet before fully tightening the butterfly nut.

The **RHINO GRIP™** comes with a slot for webbing, a hole for accepting up to a 1/2" diameter rope, and a hook for easy tie downs or for hanging items.

Packaging

The **RHINO GRIP™** comes in its own display box. Each display box contains fifty grips. The display box is perfect for displaying at the checkout counter where it has proven an excellent seller amongst the impulse purchaser.

BE PREPARED FOR ANYTHING!

MADE OF HEAVY-DUTY FIBERGLASS-FILLED NYLON!
RESISTS CRACKING TO 65° BELOW ZERO!
CREATE A GROMMET INSTANTLY ON ANY MATERIAL!

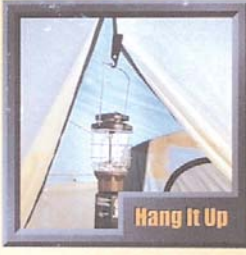

"When I saw your product, I knew that there was a possible answer to the needs of thousands of hay farmers throughout the world. The Rhino Grip's ability to be placed anywhere on the tarp, by folding the material and tightening the grip was very important to me in recommending this product. The second thing that impressed me was the multiple attachment methods for large and small ropes, bungee cords, or even webbing straps."
