

BUNK & MINERAL FEEDERS

10' METAL GRAIN FEEDER

The heaviest bunk feeder on the market, this tough Metal Grain Feeder is constructed of 14-gauge steel with heavy-duty legs. The tapered bottom provides for easy flow and holes drilled in the bottom of each end provide for drainage. Pre-drilled holes on each end of the feeder allow for multiple feeders to be joined together for continuous bunks. The units are fully stackable. Available in powder coat gray only.

Description	Item #	Height	Approx. Weight	Width
10' Metal Grain Feeder	MGF	21"	170 lbs.	28"

5' OR 10' HAY RACK

Optional Hay Rack loaded with features:

- Heavy-duty galvanized steel

Description	Galvanized Item #	Approx. Weight
5' Hay Rack	HR5	48 lbs.
10' Hay Rack	HR10	68 lbs.

BULL MINERAL FEEDERS

These heavy-duty, 3-compartment poly feeders stand up to the most difficult environmental conditions. Each compartment holds approximately 6 or 10 gallons of water or feed depending on the size. Total wet volume is 108-120 lbs. for the small and 240 lbs. for the large feeder. Total dry volume is approximately 144 lbs. for the small and 180-200 lbs. for the large. Standing 7" or 14" high, with a 30"- or 45"-diameter tub depending on the size, making these feeders heavy enough to withstand animals and the elements but light enough to move to nearly any location. Convenient anchoring holes make it easy to secure these Mineral Feeders to the ground, preventing animals from moving it. The weatherproof poly lid protects the contents of the entire feeder. Resistant to impact as well as heat and cold, these feeders present smooth edges for safety to both people and animals. These products are lightweight and can be shipped by UPS or FedEx.

Description	Item #	Height	Approx. Weight	Diameter
Bull Mineral Feeder	BMF	14"	39 lbs.	37" inside; 45" lid
Small Bull Mineral Feeder	SBMF	7"	17 lbs.	30" inside; 36" lid
